

Sheereen

My ideal NASA job would be the doctor that does a check-up on the astronauts to make sure it is safe for them to get on the ship and fly into space, and help them maintain good health. I would like to encourage others to stay away from illegal drugs, because you wouldn't be able to fly on the ship if you were a smoker or in very poor condition from drugs. I would like to be a doctor for people on Earth, so I can see the happy smiles on their faces when they feel that they are in good health.
